

# Electronics technician on active retirement (m/f/d)

Part-time

## Task Area

You will be responsible for setting up and commissioning electronic assemblies and devices  
You will take care of repairs and service processing  
You will create and optimize assembly and testing instructions

## Profile

You have completed vocational training as an electrical engineer, e.g., electronics technician for devices and systems, or comparable training  
Ideally, you will have some initial professional experience in the electronics industry  
You are characterized by your systematic, independent, and detailed approach to work  
Openness, teamwork, and communication skills are your strengths  
MS Office skills are desirable

## What you can expect from us

Of course, you will receive free fruit and drinks, but above all, you can expect exciting and varied tasks
