Software developer embedded systems (m/f/d)

Full-/Part-time **Mobile Office**

Task Area

▸ You are responsible for the development of software components for ARM-based embedded systems
▸ You take care of setting up and customizing real-time and embedded operating systems in kernel and user mode
▸ You take care of the conception, specification, verification, quality assurance and documentation of software components
▸ You implement project requirements independently with the appropriate tools
▸ You work closely with colleagues from hardware development and product management
▸ You have contact with customers from time to time, for example when it comes to answering support questions

Profile

▸ You have a degree in computer science, electrical engineering or similar.
▸ You have initial professional experience in the development of hardware-related software components.
▸ You are characterized by systematic, independent and detailed work.
▸ Openness, teamwork and communication skills are your strengths.
▸ You have a good command of German and English.
▸ Ideally, you will have experience in the field of embedded Linux, as many of our modules use embedded Linux as their operating system.

What awaits you

▸ Of course you get free fruit and drinks, but above all you can expect exciting and varied tasks.
▸ Thanks to mobile work and flexitime without core hours, you can work when and where you want, as long as you meet deadlines.
▸ Your new colleagues will accompany you during your induction and help you settle into the Digital Heroes team.
▸ Innovation is our passion: that's why we have been awarded TOP 100 Innovator twice in a row.
▸ We care about your future and offer training opportunities, child allowance, company pension plan, team events and more.
